PROFESSIONAL SUMMARY

Laravel-focused web developer with 5+ years of experience building scalable web applications, REST APIs, administration portals, payment workflows, real-time features, and AWS-backed solutions. Experienced with backend optimization, application security, MySQL and SQL Server, and third-party integrations. Supports reliable team delivery through task planning, junior-developer mentoring, pull-request reviews, reusable architecture, and cross-functional collaboration.

5+ years	12 applications	4-5 people
Software development experience	Migrated to Laravel	Cross-functional project teams

CORE EXPERTISE

Backend: PHP, Laravel, REST APIs, WebSockets, Blade, service-pattern architecture, reusable helpers, application security

Data and Integrations: MySQL, SQL Server, Stripe, Razorpay, OpenAI API, Firebase Cloud Messaging, third-party APIs

Cloud and Delivery: AWS S3, EC2, RDS, Route 53, GitHub, GitLab, Postman, MySQL Workbench, Ubuntu

Leadership: Task assignment, junior mentoring, pull-request reviews, debugging support, cross-team collaboration

PROFESSIONAL EXPERIENCE

Senior Web Developer (Laravel) Yudiz Solutions - Ahmedabad - Developed and maintained scalable Laravel web applications, administration panels, and multi-module backend systems. - Designed REST APIs consumed by separate mobile client teams and implemented real-time communication using WebSockets. - Integrated payment, AI, AWS, notification, and third-party services across production applications. - Migrated 12 applications to Laravel, improving codebase maintainability and performance. - Supported team delivery through task assignment, junior-developer mentoring, pull-request reviews, reusable service patterns, and cross-functional collaboration.	Feb 2022 - May 2026
Junior Laravel Developer Alakmalak Technologies - Ahmedabad - Worked on administration panels, core PHP applications, and Laravel backend workflows. - Built practical experience in database-backed features, maintainable application structure, and production bug resolution.	2021

EDUCATION

Bachelor of Technology in Computer Engineering - RK University, Rajkot | 2016 - 2020

HARDIK KANZARIYA

Selected Project Case Studies

Professional client work delivered in cross-functional teams of 4-5 people. Project names and identifying details are withheld for confidentiality. Mobile clients were developed by separate frontend teams; my contribution focused on Laravel backends, administration portals, and APIs.

AI-ASSISTED COLLABORATIVE WRITING PLATFORM

Laravel backend for a turn-based digital book collaboration product

Laravel | REST APIs | OpenAI API | Mobile APIs

- Developed the Laravel administration panel and API workflows for book owners and contributors.
- Implemented contributor count, writing duration, contribution limits, writing rounds, turn sequencing, and owner editing controls.
- Integrated the OpenAI API to generate story content from book titles and contributor descriptions.
- Delivered a structured collaborative-writing workflow with owner moderation and AI-assisted generation.

SUBSCRIPTION LEARNING AND VIDEO PLATFORM

Multi-course subscription platform with video delivery and real-time communication

Laravel | WebSockets | AWS S3 | Chunked Uploads | Mobile APIs

- Built administration and API workflows for courses, lectures, subscriptions, progress reports, referrals, and user communication.
- Created custom roles and permissions so sub-administrators could manage authorized modules.
- Implemented real-time chat between users and administrators using socket-based communication.
- Resolved PHP upload-limit constraints by implementing chunked uploads for large lecture videos stored on Amazon S3.

LOCATION-BASED SPORTS COACHING PLATFORM

Shared Laravel backend serving student, coaching-centre, staff, and super-admin portals

Laravel | Blade | Razorpay | AWS S3 | Firebase | Haversine Formula

- Developed REST APIs and dynamic Blade portals with separate login systems, URLs, dashboards, and workflows.
- Implemented centre registration and approval, location and sport filtering, enrolment, attendance, activities, and student video records.
- Built Razorpay fee collection, configurable commission calculations, centre settlements, S3 media storage, and Firebase push notifications.
- Mentored a junior developer through structured task assignment, pull-request reviews, service-pattern guidance, reusable helpers, and debugging support.

ADDITIONAL INFORMATION

Languages: English, Hindi, Gujarati

Availability: Available to join within 7 days

Work preference: Ahmedabad, remote opportunities across time zones, and open to relocation

Freelance focus: Laravel APIs, administration panels, integrations, optimization, maintenance, and backend delivery

Portfolio: hardiknk.github.io/hardik-kanzariya-portfolio
